

GIPO V 2400

GIPO V 2400 VSI

The GIPO V 2400 is a fully mobile processing plant, combining the proven GIPO KOMBI or GIGA system consisting of feed unit, final screening unit, integrated oversize material return, with a Magotteaux vertical impact crusher MAG'Impact, you can **crush and shape in one pass** with one machine.

The solution for processing gravel, producing end products of the highest quality, free of cracks, along with cost effective technology, exceptional wear rates and low maintenance, ensures this machine sets new standards in crushing.

The range of customer-specific options is varied and almost unlimited. Whether additional feed channel, pre screening or drive system: the plant is adapted to your needs.

TECHNICAL DATA

VERTICAL IMPACT CRUSHER

Inlet opening	1050mm
Rotor Dia.	974mm

FEED HOPPER

Volume	3m ³ *
Max feed size	130mm
Capacity	Up to 350tph
Larger capacity due to feed channel 7m ³	
Hydraulic lockable hinged walls	

CONVEYORS

Crusher Discharge Conveyor

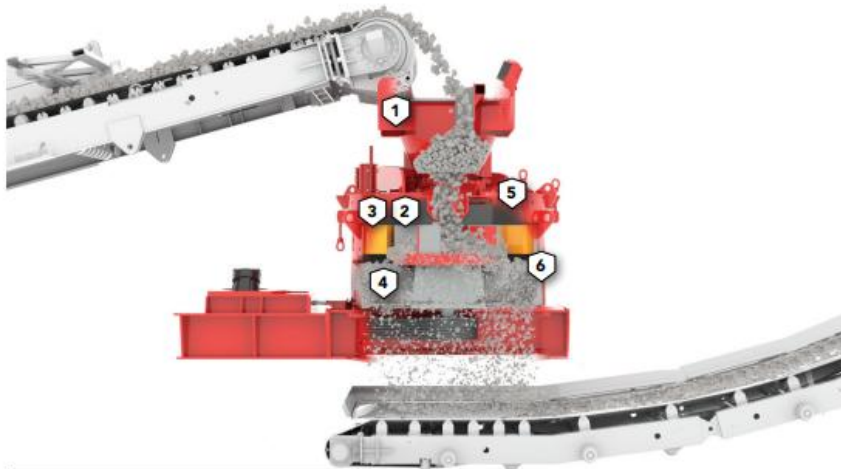

Width	1400mm
-------	--------

Feed Conveyor

Width	1200mm
Continuous loading & material distribution	
Dosing flap for controlled material flow	

Return Conveyor

Width	650mm
Can be swivelled & used as side discharge	

2400

VERTICAL IMPACT CRUSHER IN USE
