

With first class performance and marvellous particle form, the GIPO Cone Crushers are the optimal choice for second and third stage crushing. With its three-deck sieving trays, the GIPO Cone Crusher is in a league of its own when it comes to preparing spilt or crushed stone.

TECHNICAL DATA	B3 GIGA	B4 GIGA
Feed Hopper	5.5m <sup>3</sup>	6.5m <sup>3</sup>
Feed Belt (mm)	1000 x 6000	1200 x 6000
Crusher Output Belt (mm)	1000 x 12000	1400 x 12000
Main Output Belt (mm)	1000 x 8000	1400 x 8800
Three Deck Sieving Unit (mm)	1500 x 5000	1800 x 5000
Max Feed Size	190mm	220mm
Capacity	Up to 240tph	Up to 415tph
Weight (kgs) with sieving unit	56,000	70,000
Power Unit (kW)	CAT C13 328kW	CAT C15 403kW

## FEATURES

- Multiple finished sized products with one system
- Variable speed crusher drive for maximum flexibility of the crushed product size and shape
- A great reduction in the total length for transportation
- Swiss quality, high quality components for longevity & reliability
- Easy maintenance and servicing for lowest maintenance cost
- Optimal product shape and reduction
