

GIPO MAG R 2700

VSI CRUSHER

The GIPO Mag'Impact 2700 VSI is in a class of its own! This unique machine combines a feeding unit, Integrated oversize feedback with Magotteaux Vertical Shaft Impactor, you can **crush and shape in one pass** with one machine. Along with exceptional wear rates and low maintenance, ensures lower cost per tonne, this machine sets new standards in crushing.

POWERPACK

Drive	Diesel/Hydraulic
Type	Volvo TAD1643VE
Power	563kW @1900rpm
Cooling	Water Cooled
Hydraulic	Rexroths Hyd. pumps & drives

CRUSHER

Type	Mag Impact 2700 VSI
Rotor	4 bar rotor

FEED HOPPER

Volume	5m ³
Hopper walls manually foldable	
1000TPH Head drive fitted to belt feed Hopper	
Chinamans hat fitted within hopper	
Capacity	Up to 400tph

FEED CONVEYOR

1200mm x 7000mm	
Remote control of feed conveyer	

MAIN DISCHARGE CONVEYOR

12000mm x 1600mm	
Hydraulic folding	

TRACKS

80 Tonne D7 Tracks

FEATURES & BENEFITS

- Max conformed feed size 120mm
- Swiss quality
- Fully-hydraulic propulsion for continuous setting of the rotor rotation speed
- Multiple classified final particle sizes with one system
- The most modern technology, high mobility, small site footprint with minimum time needed for preparation
- Unsurpassed in performance, best particle quality
- Maintenance and service friendly
- Remote control for driving and feed channel
- Crusher deliver case with hardox lining
- Metal Detector
- Remote control for driving
- Water Spraying system without water tank

TRANSPORT DIMENSIONS

Length	18600mm
Width	3400mm
Height	3850mm
Weight	63500kg approx.
