

GIPO V 2700

GIPO V 2700 VSI

The GIPO V 2700 is a fully mobile processing plant, combining the proven GIPO KOMBI or GIGA system consisting of feed unit, final screening unit, integrated oversize material return, with a Magotteaux vertical impact crusher MAG'Impact, you can **crush and shape in one pass** with one machine.

Producing end products of the highest quality, free of cracks, along with cost effective technology, exceptional wear rates and low maintenance, ensures this machine sets new standards in crushing.

The range of customer-specific options is varied and almost unlimited. Whether additional feed channel, pre screening or drive system: the plant is adapted to your needs.

TECHNICAL DATA

VERTICAL IMPACT CRUSHER

Inlet opening	1260mm
Rotor Dia.	1160mm

FEED HOPPER

Volume	3m ³ *
Max feed size	160mm
Capacity	Up to 500tph
Larger capacity due to feed channel 7m ³	
Hydraulic lockable hinged walls	

CONVEYORS

Crusher Discharge Conveyor

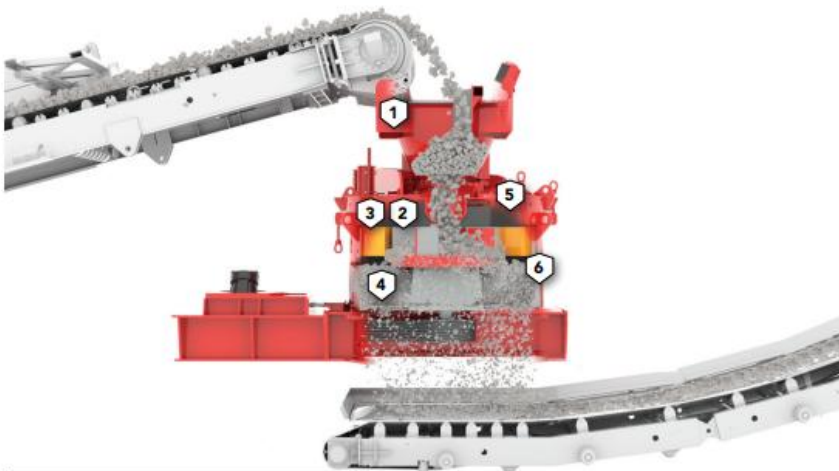

Width	1600mm
-------	--------

Feed Conveyor

Width	1200mm
Continuous loading & material distribution	
Dosing flap for controlled material flow	

Return Conveyor

Width	650mm
Can be swivelled & used as side discharge	

2700

VERTICAL IMPACT CRUSHER IN USE
